PROFESSIONAL SUMMARY

I build growth systems that connect **strategy, data, acquisition, automation, and revenue**. With **11 years of experience across B2B, B2C, and D2C environments**, I have worked across paid media, demand generation, SEO, CRM, marketing automation, analytics, technical communication, and conversion optimization. My background in **data science, analytics, philosophy, and technical writing** gives me an unusual advantage: I can interrogate the numbers, challenge assumptions, understand customer psychology, communicate complex ideas clearly, and turn insights into campaigns that move people toward action. I bring a hands-on, revenue-focused approach to growth and can adapt seamlessly across **US, Australian, Asian, and other global time zones**.

PROFESSIONAL EXPERIENCE

WALLS PROPERTY MANAGEMENT — Seattle

Growth Marketing & Lead Generation Strategist | 2023–2026

Lead growth and acquisition initiatives for a **320-unit property portfolio**, combining paid media, CRM automation, conversion optimization, analytics, and operational marketing to improve occupancy and revenue outcomes.

- Managed acquisition and marketing strategy supporting a **320-unit property portfolio** while maintaining **94.5% portfolio occupancy**.
 - Generated and supported **\$680K in monthly recurring revenue** through integrated property marketing and lead-generation initiatives.
 - Maintained a **\$62.50 blended CPA** by continuously optimizing paid acquisition, targeting, creative, landing experiences, and lead quality.
 - Increased website traffic to **24K users, a 65% increase**, while peak daily traffic reached **4,800 visitors** through coordinated acquisition and organic growth initiatives.
 - Architected a **Zapier + GoHighLevel automation system** that delivered SMS responses to inbound tour requests within **60 seconds**, dramatically reducing lead-response friction.
 - Used CRM and funnel data to identify bottlenecks between inquiries, showings, applications, and leases and translated those findings into operational marketing improvements.
 - Combined Meta advertising, SEO, CRM automation, analytics, and conversion optimization to create a connected acquisition-to-conversion system.
 - Used customer psychology and behavioral data to refine messaging around property intent, urgency, objections, and conversion actions.
 - Built reporting frameworks that connected marketing activity with operational outcomes rather than relying solely on surface-level engagement metrics.
-

EDUCATION

UNIVERSITY OF CALABAR

University Degree / B.A. Philosophy | 2020

Professional Advantage

Philosophy strengthens the skills I use every day in growth marketing: **logic, critical thinking, assumption testing, ethics, structured reasoning, empathy, argumentation, and communication.** I use these skills to question weak assumptions, understand why customers behave the way they do, interpret evidence, build clearer strategies, and communicate decisions effectively.

PROFESSIONAL VALUE

Data Scientist & Analyst: I use data to understand performance, identify patterns, challenge assumptions, and make marketing decisions measurable.

Growth Marketer: I connect acquisition, conversion, retention, automation, and revenue rather than treating channels as isolated activities.

Marketing Expert: I understand B2B, B2C, and D2C customer journeys and know how to adapt messaging, targeting, and funnel strategy to different buying behaviors.

Philosopher: I bring disciplined reasoning, intellectual curiosity, customer empathy, and assumption testing to strategic decisions.

Technical Communicator & Writer: I can turn complex products, technical concepts, data, and strategies into clear communication that customers, executives, sales teams, and technical stakeholders can understand.

Global Operator: I have successfully worked across international teams and markets and can adapt to **US, Australian, Asian, and other global time zones** without sacrificing communication, responsiveness, or execution quality.

TECHNOLOGY

Marketing: Google Ads, Meta Ads, LinkedIn Ads, HubSpot, GoHighLevel, Zapier, SEO, GEO, AEO, SEMrush, Ahrefs

Analytics: SQL, Python, Power BI, Looker Studio, GA4, Google Search Console

Operations: AppFolio, Jira, CRM Systems, Marketing Automation, Reporting Systems

AI: AI-assisted research, content systems, marketing automation, analytics, workflow design, and generative AI tools
